Knowledge-Based SYSTEMS

INDEX TO VOLUME 5: 1992

AUTHOR

Abdou, G H Integrated approach to knowledge-based process-plan generation 269

Berg-Cross, G Can a large knowledge base be built by importing and unifying diverse knowledge?: lessons from scruffy work 245

Fischer, G and Nakakoji, K Beyond the macho approach of artificial intelligence: empower human designers — do not replace them 15

Fu, L-M Detection of semantically incorrect rules in knowledge-based systems 117

Hinde, C J and Norman, M Set-theoretic equation solver based on a truth-maintained architecture 289

Holden, P Expert systems in manufacturing. Part 1: A users' perspective on expert-systems innovation 149

Holden, P Expert systems in manufacturing. Part 2: A management framework for expert-systems innovation and technology transfer 258

Huang, G O and Brandon, J A AGENTS: object-oriented Prolog system for cooperating knowledge-based systems 125

Kocura, P Conceptual and semantic structures 193

Levinson, R and Ellis, G Multilevel hierarchical retrieval 233

MacCallum, K J and Carter, I M Opportunistic software architecture for support of design coordination 55

McHale, M L and Myaeng, S H Integration of conceptual graphs and government-binding theory 213

Moulin, B Conceptual-graph approach for the representation of temporal information in discourse 183

Myers, L and Pohl, J ICADS expert design advisor: an aid to reflective thinking 41

Newton, S and Coyne, R D Impact of connectionist systems on design 66

Nogier, J-F and Zock, M Lexical choice as pattern matching 200

Preece, A D and Moseley, L Empirical study of expert system development 137

Purcell, A T and Gero, J S Effects of examples on the results of a design activity 82

Rhodes, P and Menani, S M Towards a fuzzy-logic programming system: a 1st-order fuzzy logic 106

Schön, D A Designing as reflective conversation with the materials of a design situation 3

Smithers, T, Tang, M X, Tomes, N, Buck, P, Clarke, B, Lloyd, G, Poulter, K, Floyd, C and Hodgkin, E Development of a knowledge-based design support system 31

Sowa, J Logical structures in the lexicon 173

Uma, G, Prasad, B E and Reddy, P G Framework for modeling and analysis of distributed problem-solving systems 295

Visser, W Designers' activities examined at three levels: organization, strategies and problem-solving processes 92

Wang, W and Bell, R Multilevel manufacturing knowledge in an AI-based modelling system for the design of flexible machining cells 158

Way, E C Metaphor as a mechanism for reorganizing the type hierarchy 223

Zhang, J and Roberts, P D Use of genetic algorithms in training diagnostic rules for process fault diagnosis 277

TITLE

AGENTS: object-oriented Prolog system for cooperating knowledge-based systems **Huang, G O and Brandon, J A** 125

Beyond the macho approach of artificial intelligence: empower human designers — do not replace them **Fischer, G and Nakakoji, K** 15

Can a large knowledge base be built by importing and unifying diverse knowledge?: lessons from scruffy work **Berg-Cross, G** 245

Conceptual and semantic structures **Kocura, P** 193

Conceptual-graph approach for the representation of temporal information in discourse **Moulin, B** 183

Designers' activities examined at three levels: organization, strategies and problem-solving processes **Visser, W** 92

Designing as reflective conversation with the materials of a design situation **Schön, D A** 3

Detection of semantically incorrect rules in knowledge-based systems **Fu, L-M** 117

Development of a knowledge-based design support system **Smithers, T, Tang, M X, Tomes, N, Buck, P, Clarke, B, Lloyd, G, Poulter, K. Floyd, C and Hodgkin, E** 31

Effects of examples on the results of a design activity **Purcell, A T and Gero, J S** 82

Empirical study of expert system development **Preece, A D and Moseley, L** 137

Expert systems in manufacturing. Part 1: A users' perspective on expert-systems innovation **Holden, P** 149

Expert systems in manufacturing. Part 2: A management framework for expert-systems innovation and technology transfer **Holden, P** 258

Framework for modeling and analysis of distributed problem-solving systems **Uma, G, Prasad, B E and Reddy, P G** 295

ICADS expert design advisor: an aid to reflective thinking **Myers, L and Pohl, J** 41

Impact of connectionist systems on design **Newton, S and Coyne, R D** 66

Integrated approach to knowledge-based process-plan generation **Abdou, G H** 269

Integration of conceptual graphs and government-binding theory **McHale, M L and Myaeng, S H** 213

Lexical choice as pattern matching **Nogier, J-F and Zock, M** 200

Logical structures in the lexicon **Sowa, J** 173

Metaphor as a mechanism for reorganizing the type hierarchy **Way, E C** 223

Multilevel hierarchical retrieval **Levinson, R and Ellis, G** 233

Multilevel manufacturing knowledge in an AI-based modelling system for the design of flexible machining cells **Wang, W and Bell, R** 158

Opportunistic software architecture for support of design coordination **MacCallum, K J and Carter, I M** 55

Set-theoretic equation solver based on a truth-maintained architecture **Hinde, C J and Norman, M** 289

Towards a fuzzy-logic programming system: a 1st-order fuzzy logic **Rhodes, P and Menani, S M** 106

Use of genetic algorithms in training diagnostic rules for process fault diagnosis **Zhang, J and Roberts, P D** 277
